

A COMPLETE INSPECTION SERVICE FOR  
SMALL-TO-MEDIUM SIZED BUSINESSES

**SIS**  
SLINGCO INSPECTION SERVICES

AS A COMPANY THAT HAS EVOLVED FROM A MANUFACTURING BACKGROUND, WE AT SLINGCO INSPECTION SERVICES (SIS) UNDERSTAND THE NEEDS OF THE SMALL-TO-MEDIUM SIZED BUSINESS BETTER THAN MOST.

The ultimate objective of engineering inspection is, of course, the safety of people and the efficient and safe operation of plant and equipment. This is essential from the point of view of statutory requirements and it is also, quite clearly, sound business practice.

For the managers in the businesses we serve, however, there is one other thing they look for in an engineering inspection company, and that is flexibility, a willingness to listen to their requirements

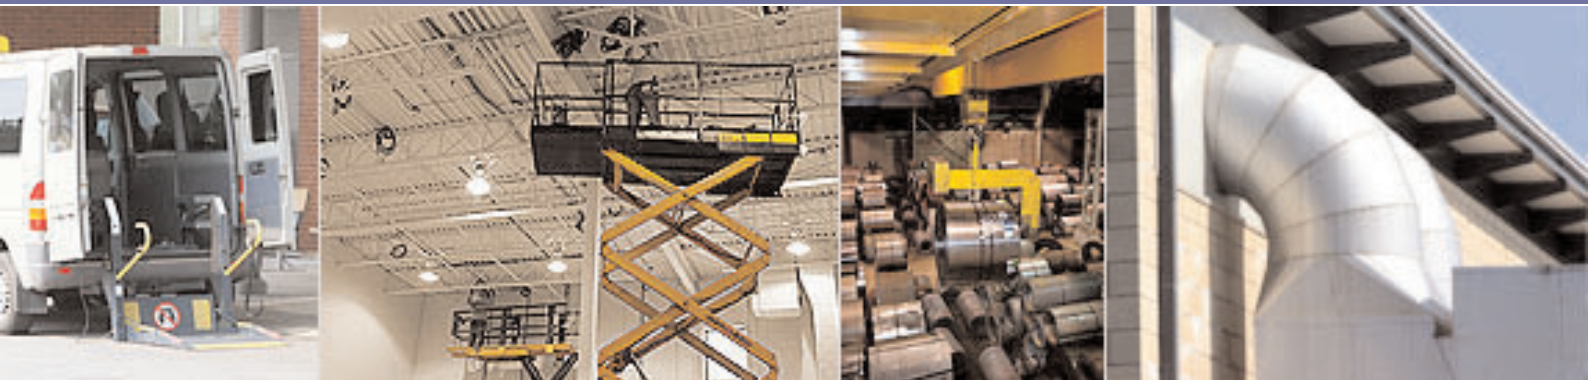

and tailor the service accordingly. We offer a cost effective alternative to the established engineering insurance/inspection companies.

Our clients, many of long-standing, range from factories, warehouses, offices, motor traders and repairers, care and rest homes, property owners and developers.

We have strong working relationships with insurance brokers and insurance consultants and pride ourselves on a professional and efficient service.

## Engineering inspection and reporting

We can undertake engineering inspection and reporting to fulfil statutory safety requirements on a range of electrical and mechanical plant, including equipment such as:

- **Passenger and goods lifts**  
Stairlifts, dumb waiters, disability access and wheelchair lifts
- **Lifting equipment**  
Hoists, cranes, garage, handling and access equipment
- **Power presses and press brakes**
- **Local exhaust ventilation**
- **Pressure systems**  
Compressed air systems; steam boilers, heating systems and autoclaves; vessels, retorts, drying cylinders; heat exchangers and refrigeration plant

We also offer:

- Written schemes of examination for all types of pressure systems - no charge for simple schemes
- Examination schemes for lifting equipment
- Witnessing of Proof Load Tests and assistance with other special services
- A rapid response to inspection requests
- Making mutually agreed appointments for inspection visits.
- Prompt issue of examination reports
- Advice on current legislation including Provision and Use of Work Equipment Regulations 1998 (PUWER), Lifting Operations and Lifting Equipment Regulations 1998 (LOLER), Pressure Systems Safety Regulations 2000 (PSSR), Control of Substances Hazardous to Health Regulations 2002 (COSHH) etc.
- A commitment to providing same day quotations wherever possible
- Advice to insurance brokers and consultants regarding inspection requirements and legislations

We are an Associate  
Member of the Safety  
Assessment Federation
